

These are the same precast camp-site fireplaces chosen by the State Parks of Maine, New Hampshire, and Massachusetts. They are very durable due to the steel reinforced, heat resistant concrete used in the manufacturing process. The assembled unit has a permanent appearance, complementing any New England setting. These precast fireplaces are ideal for back yard barbecues. The light-weight link-logs are easy to assemble, require no tools or cement, making them very mobile. All units come in one color, natural gray. The grates are adjustable with a cooking area that measures 18" wide by 22" deep. These units will either burn wood or charcoal.

Camper

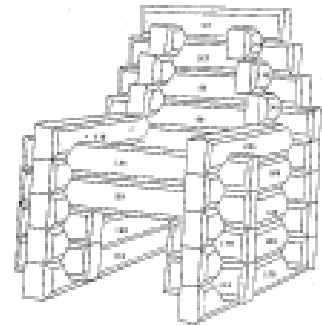

Size: 34" w x 34" d x 18" h
 Weight: 400 lbs
 One Grille

Camper Plus

Size: 42" w x 34" d x 24" h
 Weight: 535 lbs
 One Grille

Moosehead

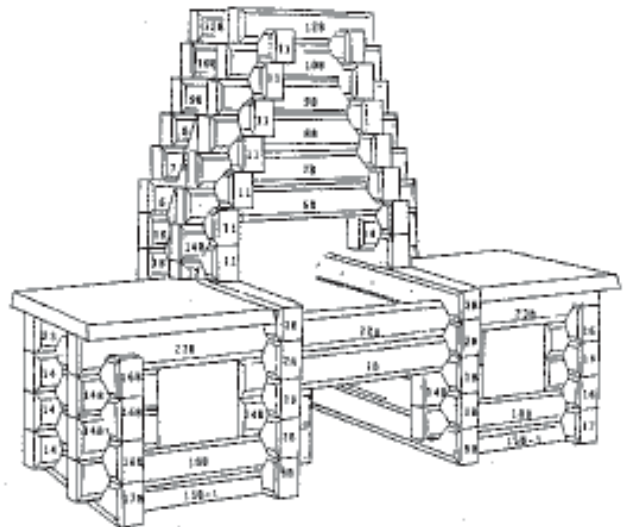

Size: 36" w x 36" d x 42" h
