Mega Wall

The Gagne Mega Wall Retaining Wall System is a heavy duty knob and groove interlock system that allows for quick and easy installation. Not only is a Mega Wall system flexible and easy to use, but extremely durable. Mega Wall systems are aesthetically pleasing, with block molded with a stone finish that gives it a natural-looking texture.

DIMENSIONS

2' x 2' x 4'
2400lbs each

FEATURES

2' x 2' x 4' Mega-size blocks for rapid construction of large retaining walls.

Save 300% of labor costs vs. the standard 8" tall segmental retaining wall system.

Interlocking knob-and-groove design makes it easy to install and automatically creates a 2" setback per course.

Available with 3" tapered sides to form curved sections, or form 90° angles with corner block.

Top blocks with a 4" recessed surface allow topsoil and grass to extend to the face of the wall.

Stone finish creates a "natural" appearance.

The Gagne Mega Wall may be up to 6' (3 Courses) high without a Geogrid layer.
