About the Instructors

All instructors have successfully completed the NCMA certification and are approved to deliver the segmental retaining wall (SRW) installation modules. Course instructors include engineers, wall installation contractors, and manufacturing representatives who are experienced in the design and construction of SRWs. Our instructors' collective experience provides a strong understanding about the system components of an SRW structure.

About NCMA

The National Concrete Masonry Association (NCMA) is the national trade association representing producers and suppliers in the concrete masonry industry. Founded in 1918, NCMA represents block producers throughout the United States and Canada, and serves international members throughout the world. These companies produce standard block, architectural block, concrete brick, segmental retaining wall unit, articulated concrete block and other specialty products. www.ncma.org
